       Subject: Alpine Coupons

              Remaining in inventory are 1,600,000 coupons, valued
       at $2520.  Also the vendor has 2,810 lb. of paper in stock,
       at a value of $1939.  This is unprinted stock and is not used
       for anything else.  When we changed the expiration and placed
       the last order, the minimum quantity of paper stock yielded
       more than we needed so we only printed our estimated needs based
       on PPC direction.  I understand the product will be removed from
       distribution in early December and at that time I will forward
       a list of all obsolete materials to Fred.
